

ZAHEER AHMAD

SOFTWARE SOLUTIONS ARCHITECT

Bangkok, Thailand+66 62 786-0007zaheercena@gmail.comlinkedin.com/in/zaheercena

PROFESSIONAL SUMMARY

Software Solutions Architect with 10+ years of experience designing, modernizing, and operating enterprise digital commerce platforms for global retail brands, including H&M, COS, and a US-based client (SnapRaise/SnapMobile, Seattle) delivered through a multi-tenant SaaS engagement. Adobe Certified Expert specializing in Adobe Commerce Cloud, Shopify Plus, AWS, and enterprise integration architecture. Leads solution architecture and platform reliability for high-traffic, high-availability commerce systems supporting multiple countries and brands across Southeast Asia, with a track record of progressing from backend engineering and technical leadership into enterprise architecture ownership.

CORE COMPETENCIES

Solution Architecture	Adobe Commerce Cloud	Shopify Plus	AWS (Lambda, API Gateway, EC2, S3, CloudFront, Route 53)		
Serverless & Cloud-Native Design	High Availability Architecture	Distributed Systems	Enterprise Integration (MuleSoft)	Akeneo PIM	
Payments (2C2P, DOKU)	Search: Elasticsearch & Algolia	API Architecture	Incident & Production Management	Performance & Security	
Technical Leadership & Mentoring					

SELECTED ARCHITECTURE IMPACT

- H&M Black Friday Virtual Waiting Room** — architected a queueing layer to protect core commerce infrastructure from traffic spikes during peak campaign launches, safeguarding site availability during the highest-risk sales event of the year.
- H&M Custom Product Ranking Engine** — designed a merchandising engine giving the business direct control over product discovery and ranking logic, independent of default platform search behavior.
- Multi-tenant Magento indexing architecture** — designed custom indexing to support 800 storefronts on a single shared commerce platform (SnapRaise/SnapMobile, Seattle), improving catalog processing efficiency at scale.
- Enterprise search migration** — led migration from Elasticsearch to Algolia for PowerBuy (Central Retail), improving product discovery and search performance.
- Regional platform ownership** — own end-to-end architecture across Adobe Commerce Cloud, Shopify Plus, AWS, Akeneo PIM, and MuleSoft for H&M, COS, and portfolio brands across Thailand, Indonesia, and Singapore.

PROFESSIONAL EXPERIENCE

Software Solutions Architect

Gill Capital Group · Bangkok, Thailand

Aug 2024 - Present

Solution architecture for H&M, COS, and portfolio brands across Thailand, Indonesia, and Singapore

- Promoted from eCommerce Support Manager to lead architecture and digital commerce transformation across H&M, COS, and portfolio brands in Southeast Asia.
- Own solution architecture across Adobe Commerce Cloud, Shopify Plus, AWS, Akeneo PIM, MuleSoft, and enterprise integrations spanning H&M Thailand, H&M Indonesia, COS Thailand, Edikted Thailand/Singapore, The Club Thailand, and Scoop Wholefoods Singapore.
- Architected the H&M Black Friday Virtual Waiting Room and the Custom Product Ranking Engine, both directly protecting revenue during peak trading periods.
- Design cloud-native and serverless integrations using AWS Lambda, API Gateway, EC2, S3, CloudFront, Route 53, and load balancing.
- Define integration architecture across payments, PIM, search, translation, and marketplace services, including 2C2P, DOKU, Akeneo, OpenSearch, Straker, Shopee, and Zalora.
- Drive platform scalability, availability, security, performance, architecture reviews, production readiness, and resolution of complex incidents, using blue/green deployment strategies to achieve zero downtime during production releases.

Ecommerce Support Manager

Gill Capital Group · Bangkok, Thailand

Aug 2023 - Aug 2024

- Led eCommerce platform operations for H&M and COS across Thailand and Indonesia, maintaining stability across business-critical digital commerce platforms.
- Managed Adobe Commerce environments covering feature delivery, releases, maintenance, production incidents, and continuous improvement.
- Coordinated engineering teams, Adobe, business stakeholders, and technology vendors on enterprise commerce delivery.
- Owned prioritization and resolution of incidents across commerce applications, payments, search, integrations, and infrastructure.
- Drove AWS and Adobe Commerce optimization initiatives focused on performance, scalability, and reliability, progressively taking ownership of solution design and technical architecture.

Sr. Magento Developer (Software Engineer Expert)

Central Retail Digital

Aug 2022 - Aug 2023

- Led Adobe Commerce engineering for PowerBuy across payments, logistics, order management, and backend integrations.
- Designed and optimized Magento indexing mechanisms to improve catalog processing, product discovery, and database efficiency.
- Delivered MCOM and OMS integrations supporting enterprise order-management workflows, and designed Store Pickup capabilities for omnichannel retail.
- Led migration from Elasticsearch to Algolia to improve product discovery and search performance.
- Improved Falcon middleware and API integrations across payment gateways, logistics platforms, ERP, and retail systems.

Team Lead, Sr. Magento Developer

Intagleo Systems

Aug 2020 - Jan 2022

Outsourced engagement for SnapRaise (now SnapMobile), Seattle, WA, USA

- Architected custom Magento indexing solutions supporting 800 storefronts on a shared commerce platform for a US-based client (SnapRaise/SnapMobile).
- Led a 14-person engineering team (Magento developers, frontend developers, QA, and integrations engineers) delivering enterprise eCommerce, marketplace, and API solutions; designed bulk product and order APIs integrating BigBuy and bespoke platforms.
- Developed Magento automation solutions to streamline deployments and reduce manual engineering effort.
- Led technical design from requirements through deployment and production support, collaborating directly with US-based stakeholders and mentoring developers on architecture reviews.

Magento Backend Developer

Black Box Concepts

Jul 2015 - 2019

- Developed and maintained Magento, Shopify, and WordPress eCommerce stores for global clients; built custom extensions and API integrations, and optimized backend performance for site speed and reliability.

SELECTED PROJECTS

- StoreGuard** — Shopify security & monitoring app helping merchants detect storefront issues and critical store changes.
- SnapRaise Platform** — Multi-tenant Magento SaaS architecture supporting 800 storefronts (Seattle-based client).
- H&M Black Friday Platform** — Virtual Waiting Room and Custom Product Ranking Engine.
- Cozmot QR Generator** — cozmot.com.
- Alt Star** — Shopify SEO application.
