ZAHEER AHMAD

SOLUTIONS ARCHITECT | IMMEDIATELY AVAILABLE
Bangkok, Thailand | +66 627860007 | zaheercena@gmail.com | LinkedIn

PROFESSIONAL SUMMARY

Software Solutions Architect with 10+ years of experience designing, modernizing, and operating enterprise digital commerce platforms for global retail brands including H&M and COS, as well as a US-based client, SnapRaise/SnapMobile, through a multi-tenant SaaS engagement. AWS Certified Solutions Architect – Associate and Adobe Certified Expert specializing in Adobe Commerce Cloud, Shopify Plus, AWS, and enterprise integration architecture. Combines a background in backend engineering and technical leadership with ownership of solution architecture and platform reliability for high-traffic, high-availability commerce systems serving multiple countries and brands across Southeast Asia.

CORE COMPETENCIES

- **Architecture & Backend**: Solution Architecture, Adobe Commerce Cloud, Shopify Plus, Serverless & Cloud-Native Design, High Availability Architecture, Distributed Systems, Enterprise Integration (MuleSoft), Akeneo PIM, API Architecture
- **Cloud & Infrastructure**: AWS (Lambda, API Gateway, EC2, S3, CloudFront, Route 53), Docker, Kubernetes
- **Databases**: MongoDB, MySQL, PostgreSQL
- **Development & Delivery**: Python, Git, CI/CD, Jenkins
- **Commerce Integrations & Search**: Payments (2C2P, DOKU), Search: Elasticsearch & Algolia
- **Operations & Leadership**: Incident & Production Management, Performance & Security, Risk Management, Technical Leadership & Mentoring

SELECTED ARCHITECTURE IMPACT

- **H&M Black Friday Virtual Waiting Room:** architected a queueing layer to protect core commerce infrastructure from traffic spikes during peak campaign launches, safeguarding site availability during the highest-risk sales event of the year.
- **H&M Custom Product Ranking Engine:** designed a merchandising engine giving the business direct control over product discovery and ranking logic, independent of default platform search behavior.
- **Multi-tenant Magento indexing architecture:** designed custom indexing to support 800 storefronts on a single shared commerce platform (SnapRaise/SnapMobile, Seattle), improving catalog processing efficiency at scale.
- **Enterprise search migration:** led migration from Elasticsearch to Algolia for PowerBuy (Central Retail), improving product discovery and search performance.
- **Regional platform ownership:** own end-to-end architecture across Adobe Commerce Cloud, Shopify Plus, AWS, Akeneo PIM, and MuleSoft for H&M, COS, and portfolio brands across Thailand, Indonesia, and Singapore.

PROFESSIONAL EXPERIENCE

Gill Capital Group

Software Solutions Architect — *Bangkok, Thailand* · **Aug 2024 - Oct 2026**

Leads solution architecture for H&M, COS, and portfolio brands across Thailand, Indonesia, and Singapore.

- Promoted from Ecommerce Support Manager to lead architecture and digital commerce transformation for H&M, COS, and portfolio brands across Southeast Asia.
- Owns solution architecture across Adobe Commerce Cloud, Shopify Plus, AWS, Akeneo PIM, MuleSoft, and enterprise integrations for H&M Thailand and Indonesia, COS Thailand, Edikted Thailand and Singapore, The Club Thailand, and Scoop Wholefoods Singapore.
- Architected H&M's Black Friday Virtual Waiting Room and Custom Product Ranking Engine to protect revenue during peak trading periods.
- Designs cloud-native and serverless integrations with AWS Lambda, API Gateway, EC2, S3, CloudFront, Route 53, and load balancing.
- Defines integration architecture for payments, PIM, search, translation, and marketplace services, including 2C2P, DOKU, Akeneo, OpenSearch, Straker, Shopee, and Zalora.
- Drives platform scalability, availability, security, and performance through architecture reviews, production-readiness work, and resolution of complex incidents; uses blue/green deployment strategies to achieve zero downtime during production releases.

Ecommerce Support Manager — *Bangkok, Thailand* · **Dec 2023 - Aug 2024**

- Led operations for H&M and COS eCommerce platforms in Thailand and Indonesia, maintaining stability across business-critical digital commerce systems.
- Managed Adobe Commerce environments across feature delivery, releases, maintenance, production incident response, and continuous improvement.
- Coordinated engineering teams, Adobe, business stakeholders, and technology vendors to deliver enterprise commerce work.
- Owned prioritization and resolution of incidents across commerce applications, payments, search, integrations, and infrastructure.

- Drove AWS and Adobe Commerce optimization initiatives to improve performance, scalability, and reliability, while progressively taking ownership of solution design and technical architecture.

Central Retail Digital
Sr. Magento Developer (Software Engineer Expert) **March 2022 - Nov 2023**
- Led Adobe Commerce engineering for PowerBuy, spanning payments, logistics, order management, and backend integrations.
- Designed and optimized Magento indexing mechanisms to improve catalog processing, product discovery, and database efficiency.
- Delivered MCOM and OMS integrations for enterprise order-management workflows and designed Store Pickup capabilities for omnichannel retail.
- Led the migration from Elasticsearch to Algolia to improve product discovery and search performance.
- Improved Falcon middleware and API integrations connecting payment gateways, logistics platforms, ERP, and retail systems.

Intagleo Systems
Team Lead, Sr. Magento Developer **Aug 2020 - Jan 2022**
Outsourced engagement for SnapRaise (now SnapMobile), Seattle, WA, USA
- Architected custom Magento indexing solutions for a US-based client, SnapRaise/SnapMobile, supporting 800 storefronts on a shared commerce platform.
- Led a 14-person team of Magento and frontend developers, QA, and integration engineers delivering enterprise eCommerce, marketplace, and API solutions; also designed bulk product and order APIs integrating BigBuy and bespoke platforms.
- Developed Magento automation solutions to streamline deployments and reduce manual engineering effort.
- Led technical design from requirements through deployment and production support, collaborating directly with US-based stakeholders and mentoring developers through architecture reviews.

Black Box Concepts
Magento Backend Developer **Jul 2015 - 2019**
- Built and maintained Magento, Shopify, and WordPress eCommerce stores for global clients, developing custom extensions and API integrations and optimizing backend performance for site speed and reliability.

PROJECTS

StoreGuard
- Shopify security and monitoring app that helps merchants detect storefront issues and critical store changes.

SnapRaise Platform *Seattle*
- Multi-tenant Magento SaaS architecture supporting 800 storefronts for a Seattle-based client.

H&M Black Friday Platform
- Virtual Waiting Room and Custom Product Ranking Engine.
